#### Description:

Eltrotec Flex MTFS are miniature, flexible, fibre-optical endoscopes which serve as valuable tools and inspection devices in many areas of quality assurance. Despite their extremely small outer diameter, the flexible micro-endoscopes are high quality instruments with a resolution of up to 30,000 image points suitable for the inspection of miniature components and channels in the fields of microelectronics, precision mechanics and research.

The object is illuminated using an external light source from our range of accessories. The endoscopes can optionally be connected to a camera system.

#### Features:

- Flexible due to special design using quartz glass fibres
- 90° mirror head with a  $\phi$  from 1.0mm
- Perfect image sharpness
- True-colour image reproduction
- Special adaptations possible

#### Operating conditions:

- Temperature in air:  
Endoscope probe: -20°C to +60°C  
Complete endoscope: -20°C to +50°C
- Pressure resistance in air: up to 5 bar
- Resistance to liquids:  
The endoscope probe can be immersed in the following liquids for short periods:  
water, saline solution (5%), kerosene, petrol, diesel, 70% alcohol
- Humidity: up to 95% at 40°  
(no condensation)
